

Music Production

I'd like to think I'm good, never had a good comment.

I sample heavy and I do what I like, normally base it on something I enjoy.

I use Ableton for the past 2 years and I won't turn back, I can rewire anything into anything as well. I'm sick with midi and virtual cables. I know my way around a synth as well, years with synths and how they work, I'm really lazy when it comes to it now though, whatever sounds good.

Here is my Blog and some of my work. Message me if you wish to work on something. Contact details in my Blog.

Hope you guys enjoy, thank you for listening.
