

Under This - Bull ***OUT NOW ON BANDCAMP!!!***

Posted by toastandjamrecordings - 2022/11/26 03:59

We're always excited when Under This checks in with a new track. His latest creation is Bull and this track certainly kicks like one. Funky percussion couples with an expertly crafted kick and snare to establish a bone-rattling beat. An electric guitar-like synth element is featured during the breakdown as the percussion loop chugs behind it. At the drop, the bassline takes center stage as Bull unleashes its fury on the dancefloor.
