

week indicator for radio schedule

Posted by VJ Air - 2007/08/29 09:06

is it possible to have some kind of "its week 1" or "its week 2" indicator?

many shows are every other week, but obviously its not as simple as remembering the 1st and 3rd wednesday (for example) as some months have 5 weeks which throws you out of sync.

obviously, people should listen to nothing but nubreaks ;) but theres a few shows on other stations which clash with shows that are every other week and i sometimes end up missing the ones on nubreaks because i loose track of which week we are on.

thats not the official schedule. we are working on a calendar system that shows per day of the week according to the date ;)

ahh, fair enough then boss!
gets back in his corner
