

## Not able to get into downloads page of the site

Posted by VS23 - 2007/10/15 07:58

---

Hey, guys. I just signed up for an account, and activated the email. I'm trying to get into the downloads page, because I heard there are free VST downloads, as well as samples for production. When I click on the download link, this is what I get:

Warning:

```
main(/home2/breaksf/public_html/beta/components/com_remository/com_remository_settings.php)
: failed to open stream: Permission denied in
/home2/breaksf/public_html/beta/components/com_remository/remository.php on line 38
```

Fatal error: main() : Failed opening required

```
'/home2/breaksf/public_html/beta/components/com_remository/com_remository_settings.php'
(include_path='/home2/breaksf/public_html/beta/administrator/components/com_smf/includes../usr/lib/p
hp:/usr/local/lib/php') in /home2/breaksf/public_html/beta/components/com_remository/remository.php on
line 38
```

Any ideas what that means, and what I need to do to get in?

=====

Ok, try it now... Some things (files and folders) had permissions changed when we moved to a more secure server, it should be all working now... let me know :)
