

CHAT -- Having problems with Chat? -- CHAT

Posted by ReFiLL - 2012/01/27 06:56

CLICK ME

NuBreaks.com Chatroom (Mibbit Style - No Java)

READ ME

If you are having problems with the JAVA chatroom, Blame JAVA.

The quickest and Easiest alternative to enter our chatroom is Mibbit (www.mibbit.com), you can enter the chatroom using this link -- <http://mibbit.com/?channel=%23nubreaks&server=cgiirc.wikkedwire.com> -- Just enter your nickname, wait a second for it to load, and you're in.

Additional options

For those of you who are running Google Chrome, go to the Web apps store and search for "Mibbit". They have a web app for chrome that works good.

If you are using Firefox, do a search for "Chatzilla" its a free IRC add on.

If you are on Internet Explorer...Seriously, get a new browser.

Even more options

Personally, I use Pidgin (its free, google it) It connects all my chats (IRC, Google Talk, Facebook, AOL, Etc)

I have also tried X-Chat, and a few others. Google Free IRC or Free Multi Chat Apps. There is even a wikipedia article about them, with a comparison chart.

Settings

The settings for reaching the chat via an IRC app are below:

IRC Network - wikkedwire.com

Chatroom - #nubreaks

Port - 6660 thru 6669 (Most default to 6667, but any port # in the range should work)

You're Welcome!
